

# FLEX ONE

## Enhanced intermediate zones for different purposes

Our Flex One design comes with an extended corridor width giving the wearer impeccable vision in the intermediate and distance visual fields. With an ideal layout of optical zones, the design provides smooth transitions between distances and wide excellent vision especially for intermediate distance view.

This makes Flex One the perfect solution for professionals demanding superior panoramic vision with great comfort and image clarity.

The Flex One design keeps the distortion extraordinarily low and smooth throughout the whole lens. Flex One includes our 4K Technology for a brilliant sharp and clear vision, and OMD Technology for minimal distortion.

### Ideal for

Experienced progressive wearers looking premium lens with enhanced intermediate vision

### Application

For precise focus at intermediate and far distance

## Design Characteristics

- Near ●●●○○
- Far ●●●●○
- Intermediate ●●●●●
- Adaptive ●●●●●

Available Corridor Length	28 mm
